

**A Modern Infertility Remedy
Based On Age-Old Wisdom
Using Unexpected -- Yet Simple Techniques!**

**Imagine This...
Affordable Treatment -- No Prescription Drugs --
Pain-Free Procedures
With *One Doctor In One Office***

**AND MOST IMPORTANT OF ALL...
You CAN Be Blessed With The
Miraculous Experience of Childbirth**

If you've given up hope of having the family you've always dreamed of -- you're not alone. Infertility is a growing phenomenon. According to the Center for Disease Control, 2.1 million married couples reported they are infertile -- that's 7% of all married couples!

But there is good news ...

You can conceive and have a healthy baby!

- It doesn't matter if you've already been told you're infertile -- chances are that you're not
- It's not impossible for you to get pregnant -- you just need the *right* help that is specifically designed for your particular situation
- There is a way you can become a mother -- in an all-natural, completely healthy, 100% safe manner ... and soon

What I'm about to reveal to you is *revolutionary*, different than anything you've heard before. Best of all ... it will work.

If you've been taking Clomid, Femara and Arimidex, or Gonadotropins such as LH, FSH, and hCG with no results -- throw those pill bottles away! The secret I will share with you is *not* the normally prescribed infertility treatment.

That being said, you need to know this:

There Isn't Anything "Wrong" With You or Your Partner -- Your Bodies Are Just Out of Balance

You found that right someone to share the rest of your life with. So it's only natural to desire the most intimate lifetime experience -- the birth of your baby. You went from being single to being a couple.

Now it's time to be a family ...

My name is Anna Benson and my husband Thad and I married 4 years ago. After failing to get pregnant over an 18-month period, I received the label "medically infertile".

Thad and I desperately wanted our own child. Upon my OB/GYN's advice, we saw 2 other specialists -- I went to a reproductive endocrinologist -- Thad visited an andrologist.

- The doctors poked and prodded -- we never connected with them on a deep emotional level.
- At times we felt like a human research project that could succeed ... or fail.
- They didn't sit down and talk *to us* -- they talked *about us* and about our infertility like typical water cooler conversation.

Although we appreciated their efforts, there was no comprehensive, personal strategy to get me pregnant.

They pigeonholed us into a predetermined plan and hoped for the best.

I Am An OB/GYN Nurse And Completely Trust Conventional Medicine But ... It Didn't Work For Me

Every day at work I saw women in all stages of pregnancy. I wanted to be one of them!

As a result, I tried ...

- Laparoscopic surgery -- but my fallopian tubes weren't blocked.
- Artificial insemination with fertility drugs -- the success rate is 8-17%. I was unsuccessful.
- In vitro fertilization, which cost *\$12,000* -- the success rate ranges from 6-35%. Once again ... I didn't get pregnant.

I cried every day -- withdrew from friends and family -- collapsed into my own world of despair. My relationship with Thad existed on rocky ground.

Then I ran into a former patient -- she carried a beautiful pink bundle.

“Stephanie, did you adopt?” I stroked the soft chubby cheeks and inhaled the fresh scent of baby powder.

She smiled and shook her head. “I met a doctor who made Jennifer possible. Here.” She handed me a card from her diaper bag.

“Dr. Cathi Swann, Naturopath.”

[Picture of Stephanie Thompson with daughter Jennifer, age 17 months]

Quite frankly, I’d never heard of naturopathy before. Being skeptical, I decided Susan just got lucky.

Four months later, my husband came home so excited he could barely talk.

“My assistant is pregnant thanks to Dr. Cathi Swann,” he said. “I made an appointment for us.”

My jaw dropped. I didn’t believe naturopathy was true -- real -- or even credible.

But I went to our appointment... with no expectations.

Imagine My Surprise When I Knew Within 5 *Minutes* That I’d Found The Answer To My Fertility Problem

I thought working for an OB/GYN gave me inside knowledge of why I couldn’t get pregnant. But when we sat down with Dr. Cathi, I learned so much.

[Picture of Theresa Monroe with son Marcus, age 2 months]

I used to refuse to go to baby showers – it was hard listening to the women talk about their babies. I didn’t fit in even though I wanted to belong to the “mother’s club”. When I met Dr. Cathi, I wasn’t sure I even wanted to try anymore. But the next baby shower was for me!

She consulted for a full hour with us!

In that session, Dr. Cathi educated us about our bodies. Did you know there is only a *48 – 72 hour period* that you are actually able to get pregnant?

I sure didn’t ...

Dr. Cathi doesn’t just treat the problem of infertility. She treats the whole body -- no expensive tests and drugs involved.

She knows each person she helps is different so Dr. Cathi will spend a lot of time with you and your partner ...

- She needs to know your medical backgrounds -- your personal and family history play an important role
- She needs to understand your lifestyle -- what your occupation is, whether you smoke or drink alcohol, what your diet is like
- She wants to know you personally -- your innermost desires, your unspoken hopes, your deepest fears ...

Then she gets to work!

Together you will come up with a personalized, comprehensive plan suitable for you. It will cleanse you and make you feel better -- stronger -- healthier and ... ready for a baby.

The 5 Most Common Barriers To Pregnancy For A Healthy Woman Are SIMPLE Problems -- With SIMPLE Solutions!

When Dr. Cathi asked me if I had cold hands and feet, I thought she was crazy.

“Cold hands and feet mean a cold ‘core’,” she said. “No tiny baby wants to live in a cold house for 9 months. Warm up the core, and pregnancy occurs shortly after.”

Look at these other 4 “problems”...

- Low back pain during menstruation -- it is a sign of kidney and spleen deficiency. If weak, they can easily be fixed.
- Processed foods and the environment we live in create dangerous toxins -- free radicals -- lack of oxygen in your cells. All are detected by a urine test and are reversible.
- Length of menstrual cycle -- if it's too short, your uterus won't thicken to prepare you for pregnancy.
- Color of menstrual blood -- it shouldn't be dark red or dark brown, but bright red. When it is the right color, you are ready to get pregnant.

[Picture of Adele and Steven Richardson with Jessica, age 3]
Our only daughter always dreamed of being a mother. Janice thought people looked at her differently -- like she was inferior -- because she couldn't conceive. Then she met Dr. Cathi. I had to go buy a bigger wallet yesterday to show off all the pictures of my granddaughter!

After our first meeting with Dr. Cathi, I knew our journey to an expanded family just began. Thad and I tried to contain our excitement -- in case it didn't work. But somehow we knew we were finally going to get the result we wanted ... our own baby.

As we worked together, our relationship grew stronger. Not only did we become physically prepared for a baby -- we became emotionally prepared.

And I fell in love with my husband all over again.

Dr. Cathi's NaturalBirth™ Program Is Not For Every Infertile Woman. Is It Right For You?

Naturopathy is a holistic way of healing. It looks for the cause of your underlying condition by assessing your whole situation -- not just treating your symptoms.

Naturopathy blends the latest scientific advancements with healing principles used centuries ago.

The aim of naturopathic treatment is to regain homeostasis, or balance of your body. Imbalance can be caused by one or more of the following issues:

- Metabolic -- hormonal discrepancies
- Physical -- such as being overweight or underweight, improper exercise
- Emotional -- having stress, depression or other emotional difficulties
- Dietary/Nutritional -- vitamin and nutrient deficiencies
- Environmental -- heavy metal toxicity, allergens, occupational hazards
- Lifestyle -- smoking, drugs, alcohol use, as well as other social factors

I got married late in life because my career was my priority. My husband and I wanted children but were scared, especially after I miscarried 3 times late in the pregnancies. With Dr. Cathi's help, we cleansed our bodies and successfully became parents!

Naturopathy encourages the healing power of nature by restoring your body's balance -- so it *can heal itself*.

One of Dr. Cathi's principle objectives is to educate you. She emphasizes prevention and self-responsibility -- allowing you to take a more active role in your own healthcare.

Assisted Reproductive Technology (ART) has been used in the United States since 1981. The usual ART methods are the costly and painful procedures of intrauterine intervention or in vitro fertilization.

However, Dr. Cathi's NaturalBirth™ route to pregnancy...

- Is more affordable -- it is, on average, one-tenth of the cost (or less!) of traditional fertility methods
- Increases your chances of getting pregnant -- Dr. Cathi pinpoints the exact causes of your infertility and uses natural healing techniques to quickly correct the problem
- Improves your overall health and well being -- not only will you'll see a dramatic change in your physical body, but also in your self-esteem, stress levels and confidence

Natural medicines work gently over a period of time to correct chronic, long-standing disorders.

What you learn from Dr. Cathi won't just help with infertility -- you will carry the principles forward in your daily living and be healthy ... for life.

Of The Women Who Take Dr. Cathi's Advice, 37.8% Are Pregnant Within 67 Days -- And Another 42.3% Are Pregnant Within 94 Days

You may still wonder why Dr. Cathi is the right naturopath for you. After all, there are others -- you may think they're all the same.

Let me tell you her story ...

At age 15, Dr. Cathi started taking birth control pills to regulate her abnormal menstruation. She took them until she married and decided to start a family. After discontinuing her birth control ... nothing happened.

Dr. Cathi found the physical pain -- emotional stress -- financial cost of fertility treatments draining. She told her doctor she didn't want continue with his methods anymore. His response: "So why are you here?"

She was furious and vowed to find an answer.

It led her on a long search -- down the road to naturopathy. While in school, she tested the exact methods she now offers her patients every day with NaturalBirth™ and ... *she got pregnant.*

Now Dr. Cathi has dedicated her life to helping women just like you.

Every year, Dr. Cathi is recognized for her work ...

- The Naturopathy Society of North America recently awarded her Naturopath of the Year.
- Naturopathy Today named her Leader in the Field of Infertility.
- OB/GYN Convention asked her to be the keynote speaker at its Annual Convention.

Not only are Dr. Cathi's credentials and success rate astounding, but consider this ...

Her 559th baby just arrived -- as healthy and beautiful as all the others!

You Are Just 13 Questions Away From The Beginning Of A New Chapter In Your Life

After your initial one-hour consultation, you will receive a 13-question evaluation form. It is very thorough and will take some time to complete.

But by the time you finish, you will understand why Dr. Cathi is asking you questions such as:

- Are your menstruations light, medium or heavy? Are they regular cycles?
- Have you ever tried acupuncture?
- Do you suffer from constipation?
- Any problems with infertility, endometriosis or miscarriages in your family?
- Do you chart your cervical fluid or basal body temperatures?

Dr. Cathi is looking at you as a whole person in a very detailed way. The answers on your questionnaire will help her create a personalized roadmap to pregnancy -- based on *your* particular needs and body deficiencies.

Her unique tests aren't agonizing -- or costly. You will be educated every step of the way so you know what the tests are for and what to expect from the results.

Once you start your plan to rebuild your body, you will sense the changes and improvements. As you become more ready to support pregnancy...

-- Your worries will decrease

-- Your confidence that you can give birth will increase

-- You will see *and feel* the reasons that this time it will work!

Dr. Cathi will also help you get emotionally ready and when the time is right...

You will "try" and successfully get pregnant!

Picture of Dana and child with caption: Dana McBride and Nathan, age 4

Here's how Dana Mc Bride, a veterinarian and one of our patients explained her experience to me:

I could quickly see and feel real physiological changes in my body as a result of Dr. Cathi's recommendations. I knew something positive was happening. I was witness to my body getting stronger. "This is working," I thought. "I'm actually going to be a mom!"

Dr. Cathi Continues To Support You *After* You Get Pregnant -- She's Devoted To Your Long-Term Health

When I conceived, I was still so frightened of another miscarriage. So I called Dr. Cathi.

She celebrated my good news and reassured me that the baby was safe. For the first 3 months, I remained guardedly optimistic -- but felt so good.

Anna and
Joshua, age 5

After Joshua graced us with his birth, Dr. Cathi ...

- Bridged the gap from pregnancy to parenthood and from womb to the world by providing post-natal care.
- Taught us about the physical, emotional and lifestyle changes we would all experience.
- Created a personalized maintenance plan to keep us healthy for life.

I believe so much in the work that Dr. Cathi does that I am now a nurse in her office. In fact, everyone who works for Dr. Cathi has been through the infertility experience -- and has successfully become parents with Dr. Cathi's help!

We understand your caution -- your fears -- your disappointments ...

We also know you deserve to have the family you've always wanted.

Still Not Sure If NaturalBirth™ Is Right For You? Here Is Your Chance To Meet Dr. Cathi -- Without Making A Firm Commitment

I know it may be hard to believe what I'm telling you. But I have never regretted my decision to step out of my traditional medicine mindset -- and explore the natural possibilities Dr. Cathi offers.

In fact, I'm so sure you'll agree with me that I've convinced Dr. Cathi to hold a special one-hour seminar the first Saturday of each month!

I want you to hear more about naturopathy and what it can do for you ...

Dr. Cathi is limiting each seminar to **10 couples** because she wants to be sure she only enrolls those who are the most committed to adding to their families.

When you call our office at (123) 456-7890 to sign up, you will pay a registration fee of \$100 that will be applied to your first consultation with Dr. Cathi. (By the way, our first seminar “sold out” within the first *six hours* after we opened up registration!)

At the seminar you’ll receive a free book with answers to the most commonly asked questions couples have.

However, if after your first consultation you don’t agree that Dr. Cathi can successfully help you conceive, **SHE WILL PROMPTLY REFUND YOUR MONEY.**

There’s no risk to you ...

Now before I get back to work, I wanted to mention this:

--When I saw the sonogram of Joshua -- I marveled at the heartbeat, fingers and toes.

--When the nurse handed him to me in the hospital -- we locked eyes and I was in awe of the life I held.

--The first time Joshua said, “Mommy”-- I cried and held his tiny body close and ... I thanked Dr. Cathi for the miracle of motherhood.

Warmly yours,

Anna Benson, RN

P.S. Dr. Cathi just added another free bonus to those who sign up for her seminar! You’ll also receive a free DVD showcasing some of our success stories -- and the struggles the couples went through before meeting Dr. Cathi.

P.P.S. When you call Dr. Cathi with the good news that you are pregnant, she has a special gift for you -- a beautiful receiving blanket to wrap your precious baby in!
